## DETAILED ACTION

### *Amendment*

1. Acknowledgement is made of Amendment filed August 17, 2005.

### *Remarks*

2. Although, the examiner previously indicated allowable subject matter in the Ex-parte Quayle action mailed 17 June 2005, upon an update search and further consideration has found new prior art and hence a rejection will be made. The examiner respectfully apologizes for any inconvenience to the applicant.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujioka (US 2003/0005321 A1).

Fujioka teaches a non-contact IC card for communication data with a reader/writer in a contactless manner (col. 1, lines 10-15), the non-contact IC card comprising:

Art Unit: 2876

encryption means (5) having a public key encryption processor for performing a public key encryption operation, and a common key encryption processor for performing a common key encryption operation (paragraphs 55, 63, and 80); and

frequency control means (9 in fig. 11) for changing an operation frequency of the non-contact IC card so that communication with the reader/writer and the encryption operations performed by the encryption means are carried out at different operation frequencies (paragraphs 70, 73 and 82).

### *Conclusion*

Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly D. Nguyen whose telephone number is 571-272-2402. The examiner can normally be reached on Monday-Friday 7:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on 571-272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
